Sangar Duraipandi

Software Engineer

Periyakulam,Tamilnadu

SUMMARY

- Highly skilled and results-driven software engineer with over 6+ years of professional experience in designing, developing, and implementing enterprise-level applications using Java, Spring, and Spring Boot.
- Proficient in creating scalable and robust solutions that meet business requirements and improve overall system performance.
- Adept at collaborating with cross-functional teams to deliver high-quality software products within tight deadlines.
- Strong problem-solving abilities with a keen eye for detail and a passion for continuous learning and professional growth.
- Hands-on experience builds front end prototypes using Html5, CSS, Bootstrap, and thymeleaf. Extensively, I used MySQL and MSSQL for mapping repositories.
- Ability to adapt and learn new technologies.

SKILLS

- **Programming Languages**: Java
- **Frameworks**: Spring, Spring Boot, Spring Cloud, Microservices
- **Beginner/Intermediate Level Experience**: JavaScript, Reactjs, Python(Django), Ruby on Rails
- **Web Technologies**: HTML, CSS, Thymeleaf, Bootstrap, RESTful APIs
- **Databases**: MySQL, PostgreSQL, MSSQL
- **ORM**: Hibernate, JPA
- **Messaging**: RabbitMQ
- **Testing**: JUnit, Mockito
- **Version Control Systems**: Git (GitLab, GitHub & BitBucket)
- **Build Tools**: Maven
- **IDEs**: STS, Eclipse, VS Code
- **Other Tools**: JIRA, Confluence, Postman
- **API Documentation**: Swagger

WORK EXPERIENCE

Software Engineer

SFW Technologies India Pvt Ltd. (Softworks)

07/2023 - Present Coimbatore

Software Engineer

Dyooti (Uplasta Technologies Private Limited)

11/2022 - 06/2023 Coimbatore

Software Engineer

SFW Technologies India Pvt Ltd. (Softworks)

07/2020 - 10/2022 Coimbatore

- Gathered requirements, performed analysis, and contributed to the design and documentation of the application.
- Developed and maintained backend systems, including integration with databases and external APIs, to support critical business functions.
- Implemented microservices using Java Spring Boot, Hibernate, and Restful services, ensuring high-quality code.
- Designed and implemented a scalable microservices architecture using Spring Boot and utilized RabbitMQ as the messaging broker for asynchronous communication between services.
- Participated in code reviews, providing valuable feedback and ensuring adherence to coding best practices and standards.
- Actively participated in agile methodology, contributing to analysis, development, bug fixing, and enhancement of the application.
- Designed application modules, base classes, and utility classes using core Java.
- Implemented customized exception handling to effectively manage exceptions within the application.
- Collaborated with the quality assurance team to identify and resolve bugs, ensuring the delivery of high-quality software.
- Optimized code to increase software performance.

Junior Software Engineer

Pinnacle Seven Technologies

05/2019 - 06/2020 Coimbatore

- Worked extensively on spring boot for building web applications.
- Conducted in-depth analysis of user requirements and effectively translated them into actionable project deliverables.
- Developed Rest APIs extensively, adhering to best practices and industry standards to create high-performing and scalable web services.
- Actively participated in all phases of the software development lifecycle, including requirement analysis, development, bug fixing, and enhancement

PROJECTS

Appointment booking & Management system

Position : Backend Developer / Lead - Backend Team

Description:

- To create an appointment scheduling tool that allows customers to easily book appointments for visiting laptop service centers and troubleshooting the issues in the customer device.
- The service center will manage the appointments & slots against their location.
- The customers will have the option to book the slots of their visits.After successful signup & login the customers can select the date, time slot to book an appointment.
- The service center portal helps to manage all the appointments, Time slots, holidays & all other availability configurations.
- The super admin portal helps to manage the user access and privileges.

Responsibilities:

- Preparing the backend and database architecture.
- Designing RESTful APIs.
- Involved in requirement analysis and formulating solutions, including High- Level Designs (HLD), Low-Level Designs (LLD), Flow Diagrams, and Database Diagrams.
- Creating task lists and sub-tasks.
- Actively involved in the development of REST APIs.Delegating tasks to the team, monitoring progress, and providing support to ensure task completion.
- Conducting code reviews.
- Managing deployments and releases.

Token Management system & Kiosk Portal

Position: Backend Developer / Lead - Backend Team

Description:

- This project enables customers to generate tokens at service centers using token machines.
- The Agent portal (a web application) is designed to manage all aspects of tokens, including tracking, calling tokens, assigning tokens to specific counters, and recording service details.
- The Admin portal is used for configuring tokens, agents, and counters.
- The Token Display portal serves the purpose of displaying counter numbers and token numbers on monitors.
- The kiosk portal assists customers in generating stickers by inputting their personal and product information. Additionally, it provides guidance to customers on how to utilize these stickers and facilitates the submission or collection of devices at the service center.

Responsibilities:

- Preparing the backend and database architecture.
- Designing RESTful APIs.
- Involved in requirement analysis and formulating solutions, including High- Level Designs (HLD), Low-Level Designs (LLD), Flow Diagrams, and Database Diagrams.
- Creating task lists and sub-tasks.

- Actively involved in the development of REST APIs.Delegating tasks to the team, monitoring progress, and providing support to ensure task completion.
- Conducting code reviews.
- Managing deployments and releases.

Child Management System

Position: Backend Developer

Description:

- To manage, track and capture all the data related to the children and their families and staff in both contract and non-contract services provided by CMS with web and mobile applications.
- Integrating multiple business processes into a single application and accessing it with ease on the web.
- Record and manage all information related to the kid and family based on the departments.
- Visibility of the client-related entries, details of the case plan, case activities, document attached to the respective client.
- Identify & capture the revision history of all the transactions.
- Record each time spent on the case of the kid.

Responsibilities:

- Requirement analysis & Creating task lists and sub-tasks.
- Actively involved in the development of REST APIs.
- Creating stored procedures, views and managing the database.
- Managing deployments and releases.

EDUCATION

Bachelor of Science in Information Technology.

Pasumpon Muthuramalinga Thevar College

Jun 2014 - Apr 2017 - Usilampatti

HONORS & AWARDS

- Best Team Player of the Year 2022
- Best Trainer of the Year 2022
- Prime Player - 2023

Languages

- Tamil & English
